Work experience

May to September 2011 Intern at University of California Santa Cruz (USA)
Android development
Developed mainly two applications for people with Alzheimer's and aphasia disease.
Participated in redaction of scientific papers.

September 2010 to May 2011 Development and project management
Project management / Python / Django
A binomial studying project consisting of a project management from the beginning to the end: we had to develop administration modules for a cloud storage solution, in Python.
We also developed a web interface in Django to make the solution easily manageable.

June to September 2010 Intern at Jurisoft Applications
Delphi / Web development
Development of upgrades for the company's main software.
Use of Delphi language with webservices for securing user registration, and to managing software updating.
Use of webservices in PHP5 to control access to the downloads parts of the website, with user authentication.

Others projects
Developed an android application to manage shopping lists and recipes.
Developed the geolocation part of an android application for a famous music festival.
Currently developing my personal website using Ruby on Rails, so as to be efficient with it.
